# Important safety instructions

## Safety precautions and maintenance

Use of control, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

Read and follow these instructions when connecting and using your display:

### Operation:

- Keep the display out of direct sunlight and away from stoves or any other heat sources.
- Remove any object that could fall into ventilation holes of power box or prevent proper cooling of the display's electronics.
- Don't block the ventilation holes on the power box.
- When positioning the display, make sure the power plug and outlet are easily accessible.
- When turning off the display by disconnecting the power cord, wait 6 seconds or more before reconnecting the power cord for normal operation.
- Ensure the use of an approved power cord provided by BenQ at all times. If your power cord is missing, please contact your local service center.
- Don't subject the display to severe vibration or high impact conditions during operation.
- Don't knock or drop the display during operation or transportation.
- Provide an earthing connection before the mains plug is connected to the mains. And, when disconnecting the earthing connection, be sure to disconnect after pulling out the mains plug from the mains.

### Maintenance:

- To protect your display from possible damage, do not put excessive pressure on the display.
- Unplug the display if you are not going to use it for an extensive period of time.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your display.
- To avoid the risk of shock or permanent damage to the set, do not expose the display to dust, rain, water, or an excessively moist environment.
- If your display becomes wet, wipe it with dry cloth as soon as possible.
- If a foreign substance or water gets in your display, turn the power off immediately and disconnect the power cord. Then remove the foreign substance or water.
- Don't store or use the display in locations exposed to heat, direct sunlight, or extreme cold.

## Read and follow these instructions when connecting and using your display:

- Unplug the display if you are not going to use it for an extensive period of time.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use alcohol, solvents or ammonia-based liquids.
- Keep the display out of direct sunlight and away from stoves or any other heat sources.
- Remove any object that could fall into the vents or prevent proper cooling of the display's electronics.
- Don't block the ventilation holes on the power box.
- Keep the display dry. To avoid electric shock, do not expose it to rain or excessive moisture.
- When turning off the display by disconnecting the power cable or DC power cord, wait for 6 seconds before reconnecting the power cable or DC power cord for normal operation.
- When positioning the display, make sure the power plug and outlet are easily accessible.
- Consult a service technician if the display does not operate normally after having followed the instructions in this manual.

## Usage

- Don't turn the ventilation hole of power box upside down as shown below.

It is prohibited to turn the ventilation hole of Power Box upside down.

It is prohibited to place tilt

- When the display is in use, as shown below, please do not open the cover of “bottom side” I/O ports.

Do not open the cover of “bottom side” I/O ports.

### Remote controller precautions:

- Power function of the remote controller works only when pointing to the front side of the display; the other functions work at either side.

Front Side (450 nits)

Back Side (700 nits)

There is a product lable at the front side.

### Power connection to the device:

- The display shall be installed nearby the sockets for easy access to the power.

## Installation notes

There are 8 holes used at the side of the display set. (M4x15mm)

Please make sure you have a solid installation as shown.

You can install the display set with 8 screws (M4x15mm).

## Package content

### Unpacking

- This product is packed in a carton together with its standard accessories.
- Due to the size and weight of this display, it is recommended to move it with at least two persons .
- After opening the carton, ensure that the contents are complete and in good condition.

## Packing list

Dual side display x1

PC box x1  
(with 24V & 12V line)

Power cord x1

Remote controller x1  
(Battery : CR 2025 3V)

# Overview

No.	Name
1	Dual side display
2	Display Set
3	Dual side remote control sensor
4	Use hole x 8 (4 at each side)
5	I/O cover x 3
